

## REMARKS

The instant amendments to the specification were necessitated by the printing branch which noted that due to amendments during prosecution there was a gap in the drawings with Figs. 14 and 15 having been deleted.

Because these errors were not detected until after the issue fee had been paid, an RCE and request for withdrawal from abandonment were necessary to place the application in proper order for allowance.

In response to the errors noted by the publications branch, figures 14 and 15 have been re-introduced into the application and those portions of the specification referencing the deleted drawings that had also been deleted have similarly been reinstated. As each of these reintroductions merely places the application in the same condition it was in as at filing, no new matter is introduced by these amendments.

Thus, it is respectfully submitted that the present case is again in condition for allowance, which action is earnestly solicited. However, if for any reason the Examiner should consider this application not to be in condition for allowance, the Examiner is respectfully requested to telephone the undersigned attorney at the number listed below prior to issuing a further Action.

Any other fee due with this paper may also be charged to Deposit Account No. 50-1290.

Respectfully submitted,

/Nathan Weber / NW
